DETAILED ACTION

Election/Restrictions

1. Applicants' election with traverse of Group I (claims 1-4) in the reply filed on 11/13/2007 is acknowledged. In response to applicants' traversal, the relied upon Ooms '695 reference is withdrawn. However, the restriction requirement is maintained in view of a new reference by Nagou et al. [US 4791144], which anticipates the claimed invention as set forth below.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagou et al. [US 4791144].

Nagou's invention relates to a microporous polypropylene film. The film has a network structure comprising intercommunicating pores having an average pore size of 0.005 to 0.6 μ , a porosity of 30 to 90%, and a thickness of 5 to 200 μ [abstract].

For claims 1-4, since Nagou's microporous film is formed of polypropylene, it inherently reads on the chemical resistant polypropylene "covering" on the film base. Nagou anticipates all the features as claimed.
